Bewegung und Training

Target Article 2007: Wulf on Attentional Focus and Motor Learning

Guidelines for Commentators

The e-journal "Bewegung und Training" (Movement and Training) is the new online-journal of the sections for motor control and learning, biomechanics and exercise science of the "Deutsche Vereinigung für Sportwissenschaft" (German Society for Sport Science). In the journal's Target Article rubric, theoretical approaches or reviews of empirical research on a movement-related question are put forward for discussion. Target Articles consist of a Main Article, a number of Comments, and the author's Response. Author of the 2007 Target Article is Gabriele Wulf with her manuscript on "Attentional focus and motor learning: A review of 10 years of research". Guest Editors of the Target Article Special Issue are Ernst-Joachim Hossner and Nicole Wenderoth.

Comments may be submitted by any member of the scientific community. In view of the journal's interdisciplinary approach, not only comments from a motor control and learning perspective are welcome but also contributions from sport and movement scientists with a biomechanical, training- and exercise-related, or any other sport-related background.

Comments may address strengths or weaknesses of the presented approach, limitations or extensions, relations or contradictions with respect to other work etc. Please refrain from statements that are not issue-related and from comments which first and foremost serve for propagating own ideas. After submission, there will be a double-blind peer-reviewing of the comments. Furthermore, the reviewers will give further recommendations when the number of commentaries exceeds the space available.

A comment consists of a title, the author(s) name and affiliation, an abstract of maximum five lines, a main text of maximum three pages (without any division by sub-headings), and a reference list. Figures or tables can be added, however, the main text has to be reduced accordingly such that the maximum length of three pages is not exceeded. Comments must be submitted in English "comment_firstauthor.doc" using comment.dot as template and taking APA conventions into account. Please find the dot-file and Main Article manuscript attached to these guidelines or on the e-journal's website (www.ejournal-but.de; option "english" directly leads to the "Discussion Forum: Target Articles").

Comments can be submitted until Mai 15^{th} , 2007 obeying the procedure as described on the e-journal's website (www.ejournal-but.de; deutsch \rightarrow Login \rightarrow Einreichen \rightarrow Kommentierter Beitrag \rightarrow table filled in as shown below \rightarrow Senden). Since the required steps are not (yet) translated into English, alternatively, comments can be submitted to Ernst-Joachim Hossner by email (hossner@uni-greifswald.de). For further information, please contact the Guest Editors.

Gastherausgeber/in	Hossner & Wenderoth
Autor/in	(Author/s of comment)
Titel	(Title of comment)
Jahr	2007
Dokument	englisch / (filename "comment_firstauthor")
Bitte ordnen Sie das Dokument	mindestens einem der unten genannten
Themenbereiche zu.	_
